

Blocked Ad Posting for Craigslist & IE 8

Make sure your Internet Explorer Browser is open.

At the top of the menu select **Tools**....then **Internet Options** located at the bottom of the list. The box below *[Exhibit 1]* will open up showing options in the General tab. Select the tab marked **Security**.

You have to add www.BostonApartments.com as a 'trusted site'. In order to do this, click the box that says '**Sites**'. The next box *Exhibit 2* will then pop up.

Exhibit 1

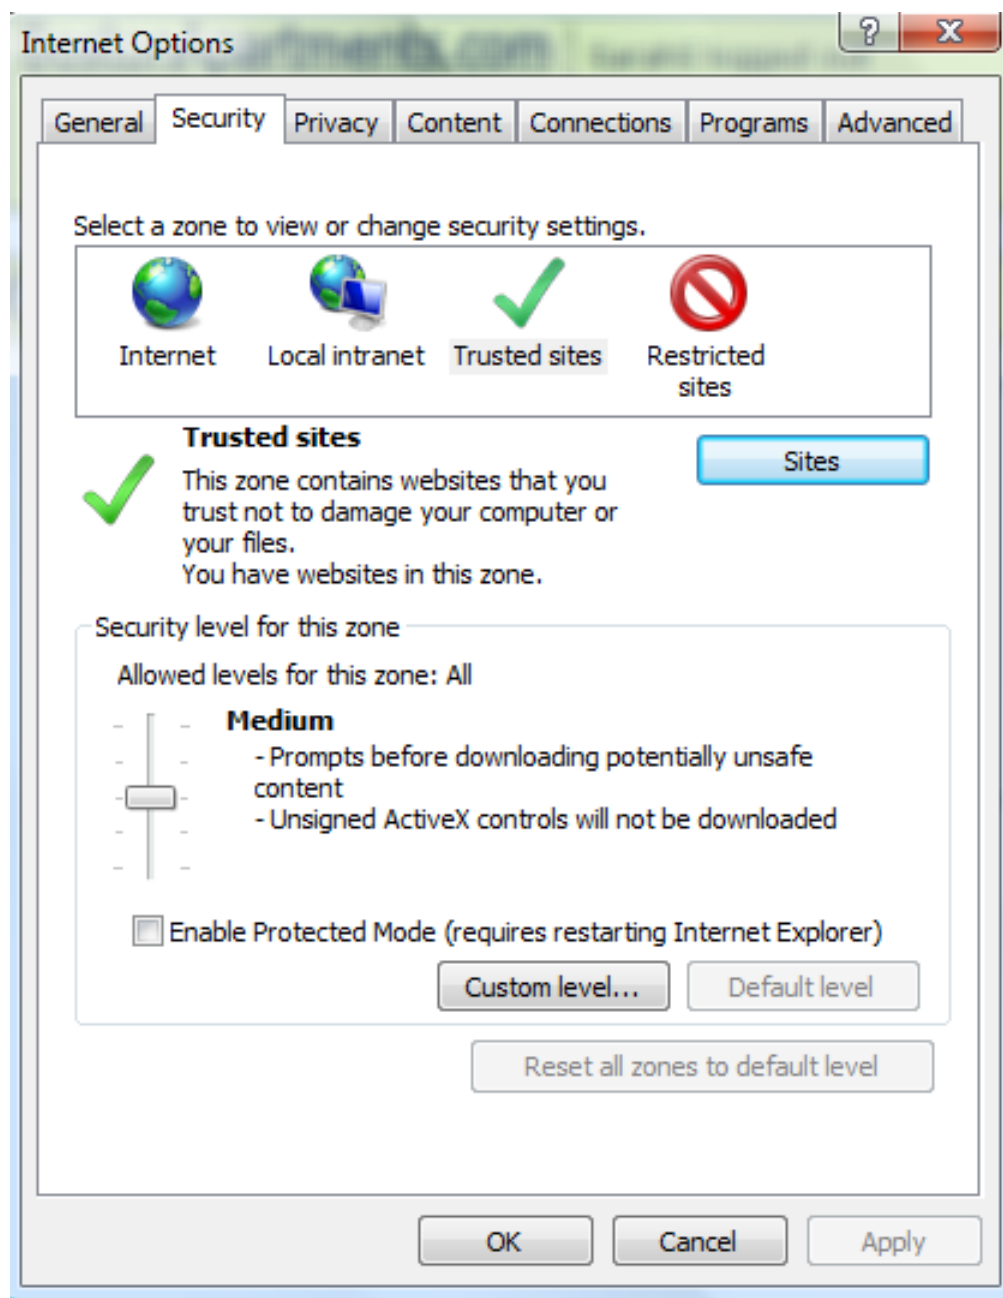

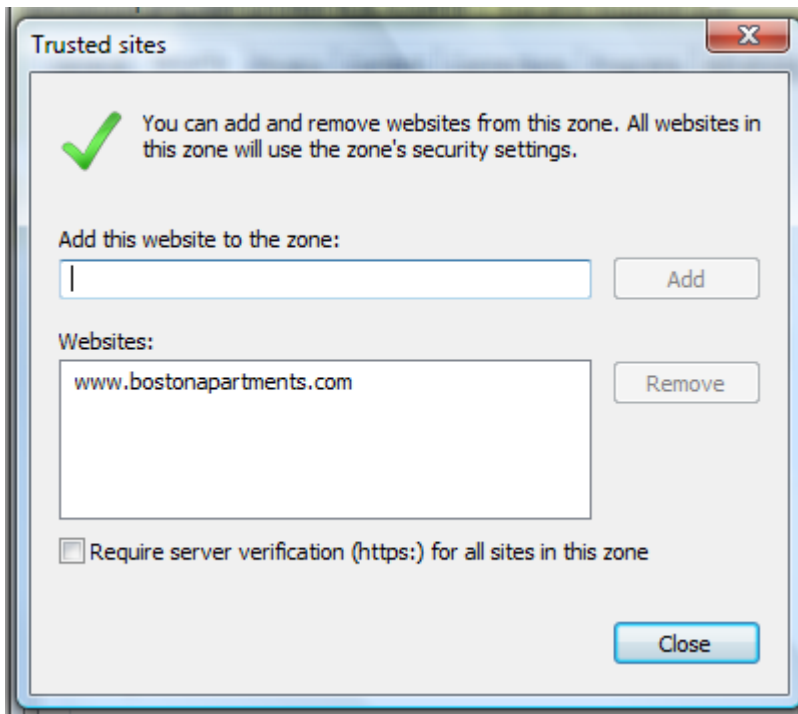

Exhibit 2

You have most likely encountered the error on craigslist & the BostonApartments site should already appear in the box labeled 'Add this website to the zone'. If not type in www.bostonapartments.com.

If this addition does not take place, make sure the box in the bottom [*require server verification (https:) for all sites in this zone*] is unchecked. This will prevent Boston Apartments.com from being in 'the approved zone' if this box is checked.
